

AVMA LISTED VETERINARY COLLEGES OF THE WORLD

(Exclusive of the United States and Canada; as of July 18, 2018)

The AVMA Educational Commission for Foreign Veterinary Graduates (ECFVG) does not represent this to be a comprehensive list of all veterinary schools in the world. The AVMA-listed Veterinary Schools of The World includes all schools that were listed by the World Health Organization in its 1991 *World Veterinary Directory* and in the 1983 Pan American Health Organization publication, *Diagnosis of Animal Health in the Americas*. The list also includes additional schools that have come to the attention of the ECFVG for reasons related to the ECFVG certification program. Such schools are listed here only after correspondence with the national government ensures that the school is officially recognized by that government as a professional school of veterinary medicine and its graduates are qualified to practice veterinary medicine within that country. The time required to verify that the school is officially recognized is variable and depends on the country or language of communication. Sometimes, it may take a long time – weeks, perhaps, even months or longer -- to get back the necessary information about school recognition within the country of origin. Candidates interested in registering for the ECFVG certification program should plan well in advance as the time required for some aspects of the certification process is beyond the control of ECFVG.

Graduates should only use the degree actually granted by their college or school of veterinary medicine. For instance, if a foreign college grants a degree of Bachelor of Veterinary Science, a graduate would sign his/her name "John Doe or Mary Smith, BVSc," and a Medico Veterinario would sign, "John Doe or Mary Smith, MV." All veterinarians may use the courtesy titles *Doctor* or *Veterinarian*. Please refer to the [AVMA Principles of Veterinary Medical Ethics](#), section II.B.3. for additional information on the ethical use of veterinary degrees.
