1. North Pole is free of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, and surra.
2. Continuous records (from the time of birth until export) of animal identification and herds of residence of the animals being exported were verified on the export health certificate by the issuing accredited veterinarian.
3. The herd is enrolled in the North Pole Chronic Wasting Disease Voluntary Herd Certification Program and has achieved Fully Certified status.
4. The animal(s) intended for export is/are not the direct offspring of an animal that has been diagnosed with chronic wasting disease; and has/have not resided at any time in a herd in which the disease has been diagnosed.
5. The herd of origin does not contain animals from any herd where tuberculosis or brucellosis (*Brucella abortus*) has ever been diagnosed.
6. Neither tuberculosis nor brucellosis has been diagnosed on the premises of origin during the five (5) years preceding the start of testing for export.
7. Animal RDLF-1225 has a glowing red nose but there is no evidence of infection or radioactivity

<p><b>Veterinary Certification:</b></p> <p>As an official veterinarian of the North Pole, I certify that the animals described above were inspected by me on this date and were in good health, free from evidence of communicable diseases, have not been exposed to communicable diseases, and meet the requirements for global transport.</p> <p>Additionally, I certify that the animals described above have been treated before and at the time of loading in accordance with the relevant provisions, in particular as regards watering and feeding, and they are fit for the intended transport.</p>	<p>Official Seal of the North Pole</p>
