AVMA-CVTEA® COVID-19 Policy

The provisions in the policy are for the sole purpose of management of the COVID-19 situation.

The provisions within this policy are in effect from April 25, 2020, until, in the view of the American Veterinary Medical Association Committee on Veterinary Technician Education and Activities (AVMA-CVTEA, The Committee), the COVID-19 situation is considered resolved.

The Committee will reevaluate the plan on an as needed basis; however, no later than at each biannual meeting until the policy is no longer in effect.

The Accreditation Policies and Procedures Manual of the AVMA-CVTEA remains the primary source document for Policies and Procedures of the AVMA-CVTEA. The following policy modifications are designed for use in response to the COVID-19 situation only. All other aspects of the AVMA-CVTEA Policies and Procedures manual continue to apply.

Assignment of Site Visit Contingency Category

At the meeting of April 25, 2020, the AVMA-CVTEA adopted the following Site Visit Contingency Category Definitions:

**Category 1a**
- New programs, with no previous site visits, graduating students in the spring

**Category 1b**
- New programs, with no previous site visits, graduating students in the fall

**Category 2**
- Existing programs with
  - Initial accreditation status
  - Probationary accreditation status
  - Full accreditation status for less than 10 years and/or VTNE 3-year pass rate < 50%
  - Full accreditation status with unmet critical deficiencies and/or development of new issues of Standards non-compliance during the accreditation cycle
  - Planned special site visits
Category 3
- Existing programs with full accreditation status for more than 10 years and
  - Unmet major deficiencies and VTNE pass rate ≥ 50%
  - No deficiencies and VTNE pass rate ≥ 50%

Category 4
- New programs requesting initial accreditation; lacking a CVTEA approved application and a confirmed site visit date

Programs have been assigned a site visit contingency category based on the published AVMA-CVTEA accreditation status as of April 25, 2020.

The assigned site visit contingency category will be used by the AVMA-CVTEA during the COVID-19 situation for the purposes of site visit contingency planning.

Site Visits
The following site visit provisions apply only to programs with site visits scheduled for 2020.

For programs who have submitted self-study reports on or before April 25, 2020, the submitted self-study can form the basis of the self-study report for the rescheduled site visit, with updates to the self-study where appropriate based on the situation and in consultation with AVMA CVTEA staff.

Upon authorization of the AVMA-CVTEA, a site visit may occur through audio and/or audio-visual means, in whole or in part. Rationale: Until early March 2020, the CVTEA site visit included CVTEA site teams physically at the site or sites of the visit. By mid- March 2020, COVID-19 caused the need for the CVTEA to conduct site visits that are audio and/or audio visual ("virtual site visits."). The functions of the virtual comprehensive site visit and the special site visit are the same as those of the comprehensive site visit and the special site visit. Although the conduct of the virtual site visit is similar to that of the non-virtual site visit, it differs in adjustment to its modalities.

In the case where a virtual site visit is conducted, an In-Person site visit will occur at the Program within a period not to exceed 12 months.

If site visits are to be conducted virtually, AVMA-CVTEA staff, the Chair of the Site Visit team, and the Program will work collaboratively to determine the most appropriate modalities and Site Visit schedule to facilitate the visit.

Category 1a
- Virtual Site Visit will be conducted, with a requirement for In-Person Site Visit within a period not to exceed 12 months.
- The accreditation decision may be made on the basis of the virtual site visit, or delayed until after the in-person visit, if the CVTEA requires further information to make an accreditation decision.
- Once the accreditation decision is finalized, it may be made effective from the date of the virtual site visit.
Category 1b

- Site Visit deferred to fall 2020
- At 8 weeks prior to the scheduled site visit the AVMA CVTEA will decide whether to proceed with planning for an In-Person site visit or to move to a virtual site visit.
- If a Virtual Site Visit occurs, an In-Person Site Visit is required within a period not to exceed 12 months.
- The accreditation decision may be made on the basis of the virtual site visit, or delayed until after the in-person visit, if the CVTEA requires further information to make an accreditation decision.
- Once the accreditation decision is finalized, it may be made effective from the date of the virtual site visit.

Category 2

- Site Visit deferred to fall 2020
- At 8 weeks prior to the scheduled site visit the AVMA CVTEA will decide whether to proceed with planning for an In-Person site visit or to move to a virtual site visit.
- If a Virtual Site Visit occurs, an In-Person Site Visit is required within a period not to exceed 12 months.
- The accreditation decision may be made on the basis of the virtual site visit, or delayed until after the in-person visit, if the CVTEA requires further information to make an accreditation decision.
- Once the accreditation decision is finalized, it may be made effective from the date of the virtual site visit.

Category 3

- Site Visit deferred to Fall 2020
- At 8 weeks prior to the scheduled site visit the AVMA CVTEA will decide whether to proceed with planning for an In-Person site visit or postpone the site visit up to 18 months.

Category 4

- Defer Site Visit to 2021 or 2022, as scheduling allows.
- Scheduling priority given to already accredited programs.

Accreditation Interval

For programs in Site Visit Contingency Category 3, the AVMA-CVTEA has authorized a temporary COVID-19 extension of the accreditation interval by a period not to exceed 18 months.
**Essential Skill Acquisition**

The Committee has made no changes to the requirement that all graduates of accredited programs must complete all essential skills prior to graduation.

In this unprecedented time, the Committee acknowledges that the most challenging skills to ensure student acquisition are the essential skills that are *italicized* and denoted by an asterisk* in Appendix I, *Veterinary Technology Essential and Recommended Skills List of the Accreditation Policies and Procedures of the AVMA-CVTEA*.

For students graduating in the **Spring of 2020** (on or before August 1st, 2020), the AVMA-CVTEA has made the following accommodation regarding the evaluation of essential skills.

If skills have been performed on live animals at clinical experience sites previously, but not assessed by program personnel, the AVMA-CVTEA will accept alternative documentation of skill evaluation as outlined below.

1. **Attestation**

   Attending licensed veterinarian or credentialed veterinary technician that has graduated from an AVMA-CVTEA accredited program at Program approved/affiliated clinical sites signs a written statement to attest that the student completed the task on a live animal consistent with the program’s established standardized criteria.

**COMBINED WITH**

2. **Summative Assessment of Essential Skills by program personnel**

   Signed attestation is combined with a summative assessment where the student demonstrates competency following established standard criteria for each essential skill. Summative assessments must be evaluated by program personnel. Examples may include the student using a model to demonstrate the procedure to Program personnel in real time.

The AVMA CVTEA requires programs to maintain documentation as evidence of skill completion and assessment for future accreditation reporting.

**Delay to Implementation Deadline for Standard 11d.**

Standard 11d. of the *Accreditation Policies and Procedures Manual of the AVMA-CVTEA* states:

> The program’s three year rolling average VTNE pass percentage for first time test takers must be 50% or higher. (*Compliance with 11d. is expected by September 1, 2020. Programs not in compliance at this time may be subject to adverse accreditation status.*)
The AVMA-CVTEA has delayed the implementation of Standard 11d. until September 1, 2021. This decision is due to AVMA-CVTEA graduates’ inability or delay in completing the Veterinary Technician National Exam for the spring 2020 testing period, during the COVID-19 pandemic.

**Reporting to the AVMA CVTEA**

**Self-Study Reports**
For programs who have submitted self-study reports on or before April 25, 2020, the submitted self-study can form the basis of the self-study report for the rescheduled site visit, with updates to the self-study where appropriate based on the situation and in consultation with AVMA CVTEA staff.

**Substantive Change Reports**
The CVTEA has made the following temporary COVID-19 changes to substantive change reporting

- **temporary** changes to the method of delivery of learning in relation to management of COVID 19 requires notification within 30 days, not pre-approval.
- **temporary** changes to the student clock hours for completion in relation to management of COVID 19 requires notification within 30 days, not pre-approval.

**Ends**
