WHY GET VACCINATED?

- Vaccination protects you and those around you: colleagues in our practice, family, friends, community.
- Building a defense against COVID-19 is a team effort. You’re a key member of our team.
- Getting the vaccine adds one more layer of protection, for you, our practice, and our community.

WHAT ELSE CAN YOU DO?

- Build confidence in vaccination. As a valued member of our veterinary healthcare team, people look up to you.
- Tell others why you’re getting vaccinated. Encourage them to get vaccinated as soon as they can.
- Enroll in the CDC’s V-safe text messaging program to help monitor vaccine safety: cdc.gov/Vsafe.
- Continue to wear a mask, maintain a 6-foot physical distance from others, avoid crowds, and practice safe hygiene.
