The Council on Education has proposed the following revisions for Standard 10, Research Program (additions are underscored, deletions are struck through)

**Standard 10, RESEARCH PROGRAM**

The college must maintain substantial research activities of high quality that integrate with and strengthen the professional program. *The college must demonstrate continuing scholarly productivity* Continuing scholarly productivity within the college must be demonstrated and the college must provide opportunities for any interested students in the professional veterinary program to be exposed to or participate in on-going high-quality research. All students must receive training in the principles and application of research methods and in the appraisal and integration of research into veterinary medicine and animal health.

**Rationale for Proposed Change(s)**
The proposed language was added to the Standard to clarify that the majority of the research programs are to be managed on campus.
