In 2019, rabid animals in the US totaled 4,690, a decrease from 4,951 in 2018 by 5.3%.

Raccoons were the most frequently reported rabid animal in the United States in 2019. Nearly 33% of animal rabies cases in the U.S. in 2019 were raccoons.

Since 2003, there have been 45 human cases of rabies. More than half were infected with a bat rabies virus.
