

Tuskegee University College of Veterinary Medicine

Standard 2 Finances

Major Deficiency:

Finances must be adequate to sustain the educational programs and mission of the college.

Standard 4 Clinical Resources

Major Deficiency:

It is essential that a diverse and sufficient number of surgical and medical patients be available during an on-campus clinical activity for students' clinical educational experience. Experience can include exposure to clinical education at off-campus sites, provided the college reviews and regularly monitors these clinical experiences and educational outcomes. Further, such clinical experiences should occur in a setting that provides access to subject matter experts, reference resources, modern and complete clinical laboratories, advanced diagnostic instrumentation and ready confirmation (including necropsy). Such examples could include a contractual arrangement with nearby practitioners who serve as adjunct faculty members and off-campus field practice centers.

Standard 11 Outcomes Assessment

Major Deficiencies:

The college must have processes in place whereby students are observed and assessed formatively and summatively, with timely documentation to assure accuracy of the assessment for having attained each of the following competencies:

1. comprehensive patient diagnosis (problem solving skills), appropriate use of diagnostic testing, and record management
2. comprehensive treatment planning including patient referral when indicated
3. anesthesia and pain management, patient welfare
4. basic surgery skills and case management
5. basic medicine skills and case management
6. emergency and intensive care case management
7. understanding of health promotion and biosecurity, prevention and control of disease including zoonoses, and principles of food safety
8. ethical and professional conduct; communication skills including those that demonstrate an understanding and sensitivity to how clients' diversity and individual circumstance can impact health care
9. critical analysis of new information and research findings relevant to veterinary medicine

The Council on Education expects that 80% or more of each college's graduating senior students sitting for the NAVLE will have passed at the time of graduation.
