

Tuskegee University College of Veterinary Medicine

Standard 2 Finances

Major Deficiency:

Finances must be adequate to sustain the educational programs and mission of the college.

Standard 4 Clinical Resources

Major Deficiency:

It is essential that a diverse and sufficient number of surgical and medical patients be available during an on-campus clinical activity for students' clinical educational experience. Experience can include exposure to clinical education at off-campus sites, provided the college reviews and regularly monitors these clinical experiences and educational outcomes. Further, such off-campus clinical experiences should occur in a setting that provides access to subject matter experts, reference resources, modern and complete clinical laboratories, advanced diagnostic instrumentation and ready confirmation (including necropsy). Such examples could include a contractual arrangement with nearby practitioners who serve as adjunct faculty members and off-campus field practice centers.

Standard 11 Outcomes Assessment

Major Deficiencies:

The Council on Education expects that 80% or more of each college's graduating senior students sitting for the NAVLE will have passed at the time of graduation.*

**Colleges that do not meet this criterion will be subjected to the following analysis. The Council will calculate a 95% exact binomial confidence interval for the NAVLE scores for colleges whose NAVLE pass rate falls below 80%. Colleges with an upper limit of an exact 95% binomial confidence interval less than 85% for two successive years in which scores are available will be placed on Probationary Accreditation. Colleges with an upper limit of an exact 95% binomial confidence level less than 85% for four successive years in which scores are available will, for cause, be placed on Terminal Accreditation. If no program graduates take the NAVLE, the Council will use other student educational outcomes in assessing compliance with the standard, including those listed in the self-study guidelines*
